

NCF RESPONSIBLE SOURCING COMMITMENT

NCF is committed to providing different Cement products of highest quality that meet or exceed our customers' expectations, dealing morally as well as ethically and respecting human rights wherever we do business. We are also committed to making a positive impact on the communities in which we are present and recognizing our obligation to help preserve the environment

This Responsible Sourcing commitment is based on the following general principles that we at NCF recognise for ourselves and also expect from our suppliers and service providers.

Raw Material Transportation, Production, Packaging and Product transportation, in compliance with legal requirements:

We expect our direct suppliers and service providers to ensure that legal requirements are met throughout their supply chain.

Continuous improvement:

We expect all our suppliers to engage in this process of continuous improvement and to verify their processes and practices in line with our Responsible Sourcing commitment. NCF will be able to provide support to suppliers in this process.

Minimum Harm to climate:

Climate change represents both a significant risk and an opportunity to take action and we are committed to working to minimize the harm to environment from our supply chains.
